

Aviation Security

Outsmart the Adversary

Commercial aviation is the most institutionally hardened critical infrastructure, since the attacks of September 11 in the United States, yet it remains one of the world's most desirable targets.

Traditional terrorism countermeasures have often proven ineffective in the protection of critical infrastructure such as airports, because they are reactive.

TAL Global's risk-based, mission-focused approach uses biometric technology, advanced, intelligence-driven passenger screening, leveraged databases, behavioral sciences, and quantifiable measurements to drive an adaptive, multi-layered process that maximizes security while optimizing resource utilization.

TAL Global will:

- ✓ Review existing security policies, procedures & technology.
- ✓ Analyze the current status of physical security at the site.
- ✓ Complete a comparative analysis of site security using comparable benchmark locations and organizations.
- ✓ Ensure compliance with relevant regulations.
- ✓ Prioritize recommended security countermeasures and implementation strategies.

We are a premier strategic consortium group that has successfully engaged in large-scale security planning and implementation projects in some of the major aviation hubs in the United States, including:

- ✓ Los Angeles World Airports
- ✓ San Francisco International Airport
- ✓ Washington Dulles International Airport
- ✓ San Jose International Airport

Our unique TDM™ process delivers the following:

- ✓ Identifying the terrorists' capabilities
- ✓ Recognition of your "attractive" vulnerabilities
- ✓ Development and implementation of a dynamic response
- ✓ Understanding the terrorists' adaptive thinking
- ✓ Training to actively respond to terrorists' adaptive changes

Our Services:

- ✓ Airports/Airlines risk and vulnerability assessments
- ✓ Turnkey aviation security - Build, Operate, Transfer (BOT)
- ✓ Enhanced Red teaming (Terrorist Decision Making -TDM)
- ✓ Process improvement/Technology Assessment for checkpoint and perimeter security
