

## Loss Prevention

### Retail Loss Prevention (LP) – Protecting Merchandize, Money and Employees

Effective Loss Prevention (LP) is mandatory for the success of any retail establishment. A well-run Retail LP program improves profitability by protecting merchandise during every step of the retail process, thereby increasing product availability. This includes properly managing inventory, effective procedures meant to protect an organization from theft and other unlawful practices and improving cash flow by protecting cash and credit sales. It also increases employees' safety by reducing worker's comp claims and creates an environment where employees feel valued and productive.

Today's Retail LP services include strategies and policies designed to increase accountability by creating partnerships with management, employees, customers, and communities. Accountability means that everybody involved with the retail experience is physically, psychologically and emotionally engaged in loss prevention. These strategies and policies are supported and enabled by technology to maximize their effectiveness.

TAL Global's Retail LP Department, headed by Mr. Mike Keenan, a veteran Retail LP innovator, offers a wide spectrum of services and capabilities – from controlling losses, protecting facilities and keeping employees safe, to complex investigations, business intelligence and Business Continuity Planning (BCP). TAL Global's Retail LP Department brings clients a unique offering of skills and experiences, spanning retail loss control, use of innovative technologies and employee ethics and behavior (including behavior management and customer conflict resolution)
